

Shyamalan Kannan

Backend, AI Systems, and DevOps Engineer | Python, TypeScript, Rust | Agent Evaluation, Data Platforms, CI/CD

 Yabuku-xD |  shyamalan-kannan |  shyamalankannan.com |  shyamalankannan@gmail.com |  +1 206-837-3570

SKILLS

Languages	Python, TypeScript, JavaScript, Rust, SQL, Bash/Shell, C#
Backend and APIs	FastAPI, Django, Axum, REST APIs, Supabase Edge Functions, OAuth 2.1, PKCE
Data and Cloud	PostgreSQL, Supabase Auth, Supabase RLS, Redis, Celery, AWS Glue, Athena, Redshift, S3
AI and ML	PyTorch, OpenAI API
Infrastructure	AWS, Docker, Vercel
Frontend and Apps	React, Vite, Tauri, SwiftUI

PROJECTS

Feedt Private repo Ongoing

- React, TypeScript, Vite, Supabase Auth/PostgreSQL/RLS, Edge Functions, YouTube OAuth*
- Built Feedt, a personal feed workspace for organizing RSS, Substack, Reddit/Hacker News, Product Hunt, CoinGecko, and YouTube sources on persistent boards.
 - Implemented Supabase Auth/PostgreSQL/RLS, feed-proxy Edge Functions, YouTube OAuth/API, signed state, token refresh, rate limits, and durable caching.

Ozark ozark-iota.vercel.app May 2026

- Python, React, SwiftUI, Vite, Vercel, Agent Evaluation*
- Created a local-first agent evaluation lab for deployment-readiness scoring across safety, task completion, guardrails, security, and latency.
 - Built a Python backend for adversarial scenarios, guardrail checks, trace replay/diffing, and live HTTP/stdio agent endpoint tests.

Ghosted github.com/Yabuku-xD/Ghosted Mar 2026

- Django, React, TypeScript, PostgreSQL, Redis, Celery, Docker*
- Built an H-1B and job-market intelligence app serving 119K+ H-1B records, 23K+ company profiles, 9K+ salary entries, and 4.4K+ live jobs.
 - Implemented Celery + Redis jobs for ATS ingestion, deduplication, TF-IDF resume matching, cached pagination, and PDF generation.

SoundunCloud github.com/Yabuku-xD/SoundunCloud Mar 2026

- Rust, Tauri, React, TypeScript, Axum*
- Built a Tauri/React Windows client with a Rust/Axum OAuth 2.1 broker for PKCE, deep-link callbacks, encrypted one-time tickets, refresh-token rotation, and in-app updates.

WORK EXPERIENCE

Software Engineer, Seattle University Apr 2025 - Mar 2026

- Improved CI/CD deployment for C# application workflows and added security scanning, cutting release time by 20% and flagging vulnerabilities before release.
- Automated build setup and operational workflows with AWS, TypeScript, and shell commands; cut delivery time from weeks to hours and reduced manual errors.

Software Engineer Intern, Finkey Consultancy Ltd Jul 2023 - Oct 2023

- Designed a Python/FastAPI pipeline on AWS Glue, Athena, Redshift, and S3 for 50K+ financial records; improved retrieval efficiency by 45% and supported risk analysis on \$30K in capital exposure.
- Built PyTorch anomaly and volatility models with OpenAI API summaries for real-time risk classification; reduced analyst review time by 40%.

EDUCATION

Sep 2024 - Mar 2026	M.S. Computer Science, Data Science, Seattle University	Seattle, Washington
Mar 2020 - Jun 2024	B.Tech Computer Science, AI & ML, Presidency University	Bengaluru, India
